- 5. *The deployment of the Net Proceeds from the Issue is based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Issue.***

Our Company intends to use the Net Proceeds of the Issue towards part funding of capital expenditure to purchase/modify vessels/boats and for meeting additional working capital requirements as described in "Objects of the Issue" on page no. 84 of this Draft Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹ 100 Crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue.

We propose to avail term loan of USD 5.88 million from Indian Exim Bank (IEB) for balance funding of second hand (2021 make) passenger vessel. IEB has agreed in principal to process above loan vide its latter dated November 7, 2023. The final sanction letter will be issued in course of time.

Any delay in Final sanction & disbursement by the Bank (IEB) or delay in delivery of passenger vessel may delay in acquiring the vessel and putting into use said vessel which may affect our business operations and profitability.

Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Further, estimates of certain costs are based on quotations received from various vendors from time to time. However, we have not entered into any definitive agreements with any of the above vendors and there can be no assurance that the same vendor would be engaged to eventually supply the above-mentioned items at the same costs. We may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Issue to achieve profitable growth in its business

- 6. *Our revenue and profits are largely dependent on chartering/ hire of barges/vessels***

Substantial revenue from operations and profit of our company are attributable from barge/vessels chartering activity. Any damage or loss to barge/vessels could result in operational loss to our company. A substantial portion of our revenue comes from winning of tenders of Government Company or ports. There may be circumstances where our existing agreements does not get renewed or may be terminated due to failure to meet the requirements of conditions of the agreements resulting into barges/vessels remaining idle or is not in use. The timing of barges/vessels will be rented is uncertain and outside our control. These processes can be impacted by a wide variety of factors including government approvals, financing contingencies, environmental conditions and overall market and economic conditions. Because a significant portion of our revenue is generated from rental of barges, our results of operations

can fluctuate from quarter to quarter and year to year depending on whether and when barges/vessels remain not in use.

- 7. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.**

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals.

Also, we are yet to obtain approvals in respect of the barges acquisition of which is one of the objects of the issue and the same shall be applied and obtained in course of time. Failure by our Company to apply in time, renew, alter, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business. Presently, our Company is using logo and we have applied for registration of the same under the Trade Marks Act, 1999. The trademark is not granted/approved as on date and we do not enjoy the statutory provisions that are accorded to a registered trademark. The use of our logo by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. There can be no assurance that our trademark application will be approved. Third parties may also oppose our trademark applications, or otherwise challenge our use of the logo. In the event that our logo is successfully challenged, we could be forced to rebrand our products, which could result in loss of brand recognition, and could require us to devote resources advertising and marketing new brand.

- 14. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.***

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

Our Company is depending significantly on the expertise, experience, and continued efforts of our Key Managerial & Production Personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience.

Competition for Key Managerial & Production Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled “Our Management” beginning on page no.139 of this Draft Prospectus.

- 16. *In addition to normal remuneration, other benefits and reimbursement of expenses to Directors (including our Promoters) and Key Management Personnel are interested in the Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, rent, incentives or benefits and reimbursement of expenses. We cannot assure you that our directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

17. *Certain unsecured loans availed by us from our Promoter Directors and relative of Director may be recalled at any time. This may affect our business and financial conditions adversely.*

We have availed unsecured loans from our Promoter Directors, as on 30th June, 2023 of ₹ 172.70 lakhs and which may be recalled at any time. Any such recall by the Promoter Directors would have an adverse impact on our cash flows as well as the finance available for the purposes of running our business. Further, such a recall could also result in a breach of the financial covenants undertaken by us while procuring secured loans from banks and financial institutions which require us to maintain these unsecured loans thereby, leading to a termination of one or more of our credit facilities, triggering cross default provisions, penalties and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations. For further details, see “Financial Indebtedness” on page no. 225 of this Draft Prospectus.

18. *Our Company if not able to manage our growth or to successfully implement our business plan could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and Increasing Operational efficiency. For further details, see the section titled “Our Business” on page no. 113 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to maintain the quality of our Services;
- Changes in the Indian regulatory environment in field

Any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

19. *Our Promoters and Promoter Group will continue to retain majority shareholding after the Issue, which will allow them to exercise significant influence and potentially create conflicts of interest.*

Our Promoter and Promoter Group may beneficially own approximately 69.44% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of

dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

20. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

21. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement for our additional Working Capital requirements, as detailed in the section titled "Objects of the Issue" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "Objects of the Issue" beginning on page no. 84 of this Draft Prospectus.

22. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in business of chartering of vessels. Our business activities attract tax liability such as Goods and Service Tax, Income Tax (including dividend distribution tax for dividend payment), and Professional Tax as per the applicable provisions of Law. We are also required to comply with the provisions such as registration under the labour laws like Provident Fund and ESI and are also subjected to deposit of Provident Fund and ESI contribution of employer and employees. Although, we have taken all the necessary approvals and deposited the required returns and taxes under various applicable Acts but any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

23. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

24. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in this draft Prospectus.*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various governmental and organizational web site data that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Industry Overview" beginning on page no. 103 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

25. *Fluctuations in vessel prices may adversely affect our financial condition and results of operations.*

We experience fluctuations in the purchase price of new and secondhand vessels which are affected by general economic and market conditions affecting the shipping industry, competition from other shipping companies, types and sizes of vessels and other modes of transportation. Our contracts for new building vessels do not provide for purchase price adjustments based on fluctuations in the market price of new building vessels. As a result, we may become contractually obligated to purchase a vessel in periods where vessel prices were high but take delivery of such vessel when vessel prices have declined, so that the market value of the vessel is below the amount we paid. If the written down value is higher than the market price and the present value of the future earning potential is not greater than the written down value, we may be required to recognize the vessel as "impaired" and take a charge for the amount of the impairment against our earnings.

In addition, as our vessels become older, they generally decline in value. Declining vessel values could affect our ability to raise cash by limiting our ability to refinance our vessels, thereby adversely impacting our liquidity. If any vessel is placed as security for our financing arrangements, and there is a drop in the value of such vessel to the extent that such value falls below the acquisition price, we may be required to provide additional security in order to maintain such financing arrangements. Failure to do so may result in such financing arrangement being terminated, and there is no assurance that we will be able to obtain other financing or incur debt on terms that are acceptable to us or at all.

- 26. *We may experience decreased revenues due to the fluctuations in charter rates, which may have a material adverse effect on our financial condition and results of operations.***

Our operating results are highly dependent on the prevailing charter rates in a given time period. Charter rates are based in part on supply and demand and are extremely competitive. Over the last decade, charter rates, vessel values and the general profitability of shipping companies have been volatile. There can be no assurance that charter rates will increase to previous levels or do so in a timely manner. Fluctuations in charter rates, or continued stagnation in charter rates, will have a material adverse effect on our financial condition and results of operations.

- 27. *We cannot assure you that we will be able to purchase or acquire new or second-hand vessels meeting our requirements at prices, delivery times or in a condition acceptable to us.***

There can be no assurance that new buildings we purchase will be completed on schedule or at all. While we would receive penalty payments from the shipbuilder, delays in the delivery of, or failure to deliver, one or more of the new buildings we purchase could have an adverse effect on our business, financial condition and results of operations. Sellers of second-hand vessels typically provide no warranties with respect to the condition of the vessels. In addition, second hand vessels may have conditions or defects that we were not aware of and our inspections of second-hand vessels prior to purchase would not normally provide us with the same knowledge about the condition of the vessels that we would have if the vessels had been built for or operated by us. Accordingly, there can be no assurance that the purchase of second-hand vessels will not result in higher than anticipated operating expenditures, including repair costs. There can be no assurance that vessels meeting our size and quality requirements will be available at prices or delivery times acceptable to us.

- 28. *Changes in technology may render our current vessel technology obsolete or may require us to make Substantial capital investment.***

The technological standards of our vessels, equipment and machinery may change based on the requirements of the industry. While we currently have a modern fleet and many of our vessels have the latest technology, the vessels, equipment and processes that we currently use may become obsolete or less efficient compared to more advanced technology vessels, equipment and processes that may be developed in the future. The cost to upgrade our vessels or equipment or implementation of such advanced technology processes could be significant and could adversely affect our results of operations and financial position.

- 29. *Our industry is highly competitive and subject to intense price competition, which could depress vessel day rates and utilization rates, thereby adversely affecting our business and financial performance.***

We operate in an intensely competitive industry, and the principal competitive factors include:

- Charter rates and other costs, service and reputation of vessel operations and crew;
- National flag preference;
- Pre-qualification criteria and prior experience;
- Operating conditions;
- Suitability of vessel types;
- Age of vessels;
- Vessel availability;
- Technical capabilities of vessels, equipment and personnel;
- Safety and efficiency;
- Complexity of maintaining logistical support; and
- Cost of moving equipment from one market to another.

We compete with local, regional and global companies, many of whom have established reputations and track records in our industry. We cannot assure you that we will be able to successfully compete in the markets in which we currently operate and intend to operate. Local competitors in each country in which we operate may have more domestic experience and better relationships with customers than we do. In addition, many governments favour, or effectively require contracts to be awarded to local contractors or require foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. Such policies may affect our ability to compete effectively. Compared to us, some of our competitors are larger, have more diverse fleets and businesses, have greater financial and other resources, greater brand recognition and reputation, greater geographical reach and lower capital costs. This allows them to better withstand industry downturns, compete on the basis of price, relocate assets more easily and build or acquire additional assets, all of which may affect our revenues and profitability. Moreover, if other companies relocate or acquire vessels for operations in the geographical regions where we operate, the level of competition in such regions may increase, and our business and financial performance could be adversely affected as demand for our vessels and services could be negatively affected by increased supply of similar vessels and services.

30. *We are subject to hazards customary to the operation of vessels and unforeseen interruptions that could adversely affect our financial performance, for which we may not be adequately insured or indemnified. If we are unable to obtain adequate compensation under our insurance coverage, our business and financial condition would be adversely affected.*

Our operations are subject to various operating hazards and risks, including:

- Catastrophic marine disasters;
- Delays entering foreign ports, including as a result of congestion, or port-state compliance procedures;
- Adverse sea and weather conditions;
- Mechanical failures;
- Navigation errors and crew negligence;
- Vessel collisions;
- Oil and hazardous substance spills, containment and clean up;
- Labor shortages and strikes;
- Unanticipated geological conditions;
- Damage to and loss of vessels, drilling rigs and production facilities; and
- War, sabotage, piracy and terrorism risks.

These risks present a threat to the safety of personnel and to our vessels, cargo, equipment under tow and other property, as well as the environment. We could be required to suspend our operations as a result of these hazards. In such an event, we would experience loss of revenue and possibly property damage, and additionally, third parties may have significant claims against us for damages due to personal injury, death, property damage, pollution and loss of business. Additionally, we may be penalized by the relevant authorities if we are determined to be responsible for the occurrence of any of such hazards. If we are unable to obtain adequate compensation under our insurance coverage, our business and financial condition would be adversely affected. In addition, please see the risk factor “We may not have adequate insurance and we are subject to uninsured risks” below.

31. *Our growth depends on our ability to expand relationships with existing charterers and new charterers in a highly competitive environment.*

Shipping charters are awarded based upon a variety of factors relating to the vessel operator, including:

- Shipping industry relationships and reputation for customer service and safety;
- Shipping experience and quality of vessel operations (including cost effectiveness);
- Quality and experience of seafaring crew;
- The ability to finance new vessels at competitive rates and financial stability in general;
- Relationships with shipyards and the ability to get suitable berths;
- Construction management experience, including the ability to obtain on-time delivery of new vessels according to customer specifications;
- Willingness to accept operational risks pursuant to the charter, such as allowing termination of the charter for force majeure events; and
- Competitiveness of the bid in terms of overall price.

We expect substantial competition from a number of experienced companies, including state-sponsored entities and major shipping companies. Some of these competitors have significantly greater financial resources than we do, and can therefore operate larger fleets and may be able to offer better charter rates. We anticipate that an increasing number of marine transportation companies will enter the container lines sector, including many with strong reputations and extensive resources and experience. This increased competition may cause greater price competition for time charters. As a result of these factors, we may be unable to expand our relationships with existing customers or to obtain new customers on a profitable basis, if at all, which would have a material adverse effect on our business, results of operations and financial condition and our ability to pay dividends to our stockholders.

32. *Termination of contracts for the employment of our vessels or inability to obtain contracts for the employment of our vessels for any significant period may adversely affect our financial condition and results of operations.*

Certain of our vessels operate under spot contracts or under short term charters. We expect to continue to operate in the spot markets or enter into contracts which are relatively short-term in nature with respect to some of our vessels. The initial term of some of our charter parties, with attached options, may be extended on one or more occasions, at the discretion of our customers. Management of mobilizing of our fleet for optimal use may as a result be difficult, and significant periods may exist between projects during which our vessels are idle. In addition, our vessel charter contracts may be subject to early termination by our customers under certain conditions, such as defaults by the parties, force majeure events, our failure to commence our services on schedule, the loss or destruction of the vessel and breach of any material provision by us of the charter party. In addition, contracts for the employment of our vessels may grant our clients the right to terminate such contracts or otherwise intervene in the performance of such contracts, if they believe that we are not performing our obligations in a satisfactory manner or in accordance with industry standards, and we are not entitled to any termination compensation in such circumstances. Contracts for the employment of our vessels may also grant our clients a discretionary right to terminate the contract at any time upon relatively short notice for no reason whatsoever. While some of these contracts have early termination penalties or other provisions designed to discourage our customers from exercising such options, we cannot assure you that our customers would not choose to exercise their termination rights in spite of such penalties.

Additionally, customers without contractual termination rights may choose to terminate their contracts despite the possibility of litigation.

In the event of an early termination of any of contracts for the employment of our vessels, there can be no assurance that we will then be able to obtain other contracts for the employment of such vessels at equivalent or higher rates, or at all. If we are unable to obtain contracts for the employment of any of our vessels for a significant period, or if we are only able to do so at rates lower than previously obtained, our financial condition and results of operations would be adversely affected.

33. *Our results of operations may be adversely affected by foreign currency exchange rate fluctuations and movements in interest rates as well as changes to the accounting treatment of the effects of such fluctuations and movements.*

While our reporting currency is in Indian Rupees, a significant portion of our revenue and expenditure is denominated in foreign currencies. As a result, we are exposed to foreign currency exchange rate fluctuations and exchange rate risks, which may affect our financial performance and results of operations. We derive most of our revenues from contracts for the employment of our vessels that are denominated in foreign currencies, primarily the US Dollar. Any appreciation in the value of the Indian Rupee in relation to the value of the applicable foreign currency could adversely affect our reported operating revenues. Additionally, some of our operating costs and the majority of our interest costs are denominated in foreign currencies, primarily the US Dollar. While this may help reduce the impact of foreign currency exchange rate movements to a certain extent, our results of operations may be adversely affected by an appreciation in the value of the Indian Rupee. Movements in exchange rates may also result in foreign currency translation gains or losses on current assets and liabilities including, significantly, bank balances and debtors, thereby affecting our profit and loss account.

To minimize the impact of foreign exchange fluctuations on our cash flows, we attempt to match the currency of our debt with the currency of our revenue. While depreciation in the value of the Indian Rupee against foreign currencies has a favorable impact on our revenues, it will result in an increase in the servicing costs on our foreign currency denominated debt and the value of our foreign currency denominated debt on our balance sheet. We currently account for the effect of fluctuations in exchange rates on the repayment of loans borrowed and the revaluation of foreign currency loans for the acquisition of depreciable capital assets by adjusting the cost of the asset on our balance sheets. This may affect our financials through depreciation charges. However, with effect from April 1, 2011, as a result of an anticipated change in accounting rules as well as the implementation of IFRS, we would be required to account for such fluctuations on our profit and loss account. This would affect our results of operations.

The exchange rate between the Indian Rupee and the US Dollar has changed substantially in the recent years and may continue to fluctuate significantly in the future.

34. *We have high levels of fixed costs that will be incurred regardless of our level of business activity. Non employment of vessels or low productivity due to reduced demand, weather interruptions or other causes can have a significant negative effect on our results of operations and financial condition as a consequence.*

Our business has high fixed costs as our interest costs and operating and maintenance costs will not necessarily fluctuate in proportion to changes in operating revenues. Operating revenues may fluctuate as a function of changes in day rates. However, interest costs and costs for operating our vessels are generally fixed or only semi-variable regardless of the day rates being earned. In addition, should our vessels incur idle time between contracts, we typically do not reduce staff as we require the personnel on-board to prepare the vessel for its next voyage. During times of prolonged reduced activity, reductions in costs may not be immediate as portions of the on-board personnel may be retained for a period of time, after which they are assigned to active vessels or their contracts conclude. Non

employment of vessels or low productivity due to reduced demand, weather interruptions or other causes can have a significant negative effect on our results of operations and financial condition as a consequence.

- 35. *We are susceptible to unexpected increases in operating costs, which may exceed estimates upon which our long-term contracts for the employment of our vessels are based and this could adversely affect our results of operations.***

As most of our long-term contracts for the employment of our vessels are on a fixed day rate basis, we have a limited ability to adjust rates in response to any increase in the costs of maintenance, repairs, spare parts, salaries, consumables and compliance with any new rules and regulations. Such costs are unpredictable and fluctuate based on events beyond our control, and any substantial increase in such costs would adversely affect our profitability. The mismatch of potentially increasing costs and fixed day rates is exacerbated by the option given to customers under some contracts to extend such contracts at the day rates applicable during the initial contractual term.

Our actual costs and any gross profit realized on our fixed day rate contracts for the employment of our vessels will often vary from the estimated amounts on which these contracts were originally based. This may occur for various reasons including, among other things, errors in estimates or bidding, changes in availability and cost of labor and materials, as well as lower day rates applying for longer periods than originally estimated. These variations and the risks inherent in our industry may result in reduced profitability or losses on contracts. Depending on the duration of a contract, minor variations from estimated contract performance could also result in an adverse effect on our results of operations.

- 36. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.***

Our Company has entered into various transactions with our directors, promoters and group companies. These transactions, inter-alia includes purchase, sales, job work, remuneration, loans and advances etc. For details, please refer to "Annexure X - Related Party Transactions" under Section titled "Financial Information of the Company" and Chapter titled "Capital Structure" beginning on page no. 165 and 62 respectively of this Draft Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution in accordance with Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

RISK FACTORS RELATED TO EQUITY SHARES

- 37. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page no. 164 of this Draft Prospectus.

- 38. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.***

The Issue price based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

- 39. *The Equity Shares issued pursuant to the Issue may not be listed on the Stock Exchange(s) in a timely manner, or at all, and any trading closures at the Stock Exchange(s) may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in developed economies. The Stock Exchanges have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delay and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of the Equity Shares.

40. *Any further issuance of Equity Shares by our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

41. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Power (Transmission and Distribution) companies generally;
- Performance of our competitors in the Power (Transmission and Distribution) industry and the perception in the market about investments in the Trading sector;
- Significant developments in the regulation of the trading and distribution industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share.

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

- 42. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time***

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

- 43. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India, upto an amount of ₹ 1 lakh, if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

- 44. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations***

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment or freely accessible vaccine for larger section of the population is available yet. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in

India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty.

It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but we cannot assure that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further if the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

45. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs

A majority of the provisions and rules under the Companies Act, 2013 have been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013, and amendments there to, has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Draft Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and

complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

46. *Environmental and safety regulations impose additional costs and may affect our Company's results of operations.*

Our Suppliers are subject to various central, state and local environmental and safety laws, concerning issues such as harm caused by air or waste water emission and the investigation and contamination. While we believe that our suppliers are currently in compliance with all material respects with applicable environmental laws and regulations, additional costs and liabilities related to compliance with these laws and regulations are an inherent part of their business. Further, while they currently intend to continue to comply with applicable environmental legislation and regulatory requirements, any changes in the applicable laws and regulations in the future may create substantial environmental compliance or remediation liabilities and costs, including monetary fines, criminal penalties on our Suppliers for violation of applicable laws, or imposition of restrictions on our Suppliers operations (which may include temporary suspension or closure of its operations). This may also increase our Company's cost and affect our revenues in the future.

47. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, financial condition, results of operations and prospects.*

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to "Key Industry Regulations and Policies" on page no. 127 of this Draft Prospectus for details of the laws currently applicable to us. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge currently being collected by the central and state governments. The GST is expected to increase tax incidence and administrative compliance. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences.

In the absence of any precedents on the subject, the application of these provisions is uncertain. The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

48. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

49. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities in India or any region of our trade may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

50. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war in any region of our trade may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India, Africa and Middle East are regions that have witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in any such region could have a negative impact on the value of business and eventually the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies

involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

- 51. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.***

Our financial statements, including the financial statements provided in this Draft Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements.

- 52. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business***

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

- 53. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.***

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time-to-time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between

listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

54. *Rising fuel prices and other unexpected expenses may adversely affect our profitability.*

The price and supply of fuel is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil and gas, actions by Organization of the Petroleum Exporting Countries and other oil and gas producers, war and unrest in oil-producing countries and regions, regional production patterns and environmental concerns. As a result, an increase in the price of fuel may adversely affect our profitability. In the last decade, the prices for fuel have been increasing as well as volatile. A significant or sustained increase in the price of fuel or reduction in supply could increase our operating expenses and we may not be able to successfully pass on the costs to our customers and have a material adverse effect on our financial condition and results of operations. Such increase may also reduce the profitability and competitiveness of our business versus other forms of transportation, such as truck or rail.

55. *Our vessels could be arrested by maritime claimants, which would result in a significant loss of earnings and cash flow, thereby adversely affecting our financial condition and results of operations.*

Under the maritime law of many jurisdictions, claimants for breach of certain maritime contracts, vessel mortgagees, suppliers of goods and services to a vessel and shippers and consignees of cargo and others having maritime claims, may arrest a vessel through a court process to obtain security for their claims. In addition, in certain jurisdictions, a claimant may be able to arrest a “sister ship,” i.e., the vessels which are owned or controlled by the legal or beneficial owner of that vessel. Besides, in some jurisdiction, it is also possible to arrest an “associate ship”, which is owned by different legal entities but having common legal or beneficial control. Our vessels may therefore be arrested with respect to a claim against the beneficial owner of our vessels. In certain circumstances, claimants may have maritime liens against our vessels, and such vessels may be arrested even if the claim giving rise to maritime lien is not against us. Although none of our vessels have been arrested, the arrest of one or more of our vessels in the future could result in a material loss of earnings and cash flow for us or require us to provide security to have the arrest lifted. If any of our vessels are arrested over a prolonged period, we may be required to prepay the loan that we have taken to purchase the affected vessel which may adversely affect our liquidity and cash flows.

56. *Our operations are subject to various state, local and other laws and regulations, including extensive health, safety and environment (“HSE”) laws and regulations that could require us to make substantial expenditures and expose us to substantial liability.*

We must comply with Indian law and regulations, as well as certain international conventions, the rules and regulations of certain private industry organizations and agencies, and laws and regulations in jurisdictions in which our vessels are registered and operate. These regulations govern, among other things, health and safety of employees, discharges of hazardous substances into the environment, the removal and clean-up of environmental contamination and the handling and disposal of waste. If we fail to comply with the requirements of any of these laws or the rules or regulations of these agencies and organizations, we could be subject to substantial administrative, civil and criminal penalties, the imposition of remedial obligations, and the issuance of injunctive relief.

Certain HSE laws provide for strict, joint and several liability, without regard to negligence or contributory fault, for natural resource damages, health and safety remediation, and clean-up costs of

spills and other releases of hazardous substances, and such laws may impose liability for personal injury or property damage as a result of exposure to hazardous substances. Such HSE laws and regulations may expose us to liability for the conduct of others.

We cannot assure you that we will be able to comply with such HSE laws in the future. The failure to comply with such HSE laws or regulations could result in substantial costs and/or liabilities to third parties or government entities, which could result in an adverse effect on our business, financial condition, results of operations and prospects.

57. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, and the poor performance of its large agricultural and manufacturing sectors, trade deficits, and recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

GLOBAL ECONOMIC OVERVIEW

Today the world economy at one side is showing signs of recovery from COVID-19 pandemic and on the other side it is facing the uncertainty of Russia- Ukraine war. The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions. The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a "global health emergency." Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. On the inflation front, it remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments. As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations

(Source: World Economic update, Near Term Resilience Persistent Challenges July 2023)

Global Economic also witnessed failures of banks. The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure.

Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has

shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks’ tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geoeconomic fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing—particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability

Baseline Scenario

The baseline forecast is for global output growth, estimated at 3.4 percent in 2022, to fall to 2.8 percent in 2023, 0.1 percentage point lower than predicted in the January 2023 WEO before rising to 3.0 percent in 2024. This forecast for the coming years is well below what was expected before the onset of the adverse shocks since early 2022. Compared with the January 2022 WEO Update forecast, global growth in 2023 is 1.0 percentage point lower, and this growth gap is expected to close only gradually in the coming two years which is shown in graph below.

Economic Prospects

For emerging market and developing economies, economic prospects are on average stronger than for advanced economies, but these prospects vary more widely across regions. On average, growth is expected to be 3.9 percent in 2023 and to rise to 4.2 percent in 2024. The forecast for 2023 is modestly lower (by 0.1 percentage point) than in the January 2023 WEO Update and significantly below the 4.7 percent forecast of January 2022. In low-income developing countries, GDP is expected to grow by 5.1 percent, on average, over 2023–24, but projected per capita income growth averages only 2.8 percent during 2023–24, below the average for middle-income economies (3.2 percent) and so below the path needed for standards of living to converge with those in middle-income economies.

(Source: World Economic outlook, A Rocky Recovery, April-2023, IMP)

Inflation

Inflation is one of the key factors in economic study, The baseline forecast is for global headline (consumer price index) inflation to decline from 8.7 percent in 2022 to 7.0 percent in 2023. This forecast is higher (by 0.4 percentage point) than that of January 2023 but nearly double the January 2022 forecast. Disinflation is expected in all major country groups, with about 76 percent of economies expected to experience lower headline inflation in 2023. Initial differences in the level of inflation between advanced economies and emerging market and developing economies are, however, expected to persist. The projected disinflation reflects declining fuel and nonfuel commodity prices as well as the expected cooling effects of monetary tightening on economic activity. At the same time, inflation excluding that for food and energy is expected to decline globally much more gradually in 2023: by only 0.2 percentage point, to 6.2 percent, reflecting the aforementioned stickiness of underlying inflation. This forecast is higher (by 0.5 percentage point) than that of January 2023.

(Source: World Economic outlook, A Rocky Recovery, April-2023, IMP)

Central banks around the world are frantically dancing to the tune of inflation, which seems to be coming under control, although is still far from being tamed completely. Between the three major central banks—the US Federal Reserve (Fed), the European Central Bank (ECB), and the Bank of England (BoE)—the policy rates have been raised by 1440 bps within a span of 18 months. Yet, the 12-month average inflation after the first policy rate hike is significantly higher than the 12-month average inflation prior to the hike in these countries. Instead, liquidity conditions have tightened too quickly in countries that had ultra-loose monetary policies for over a decade. Since these countries also host a large share of global investors, such an aggressive measure has unnerved the sentiments, leading to capital outflows from emerging countries.

Trends in Oil Price:

Global crude oil prices have been trending down over the past few weeks owing to increased oil flows from Russia into the global markets, rising US production, and concerns over oil demand amid a weak economic outlook this year. This is despite the two cuts in oil production by the Organization of the Petroleum Exporting Countries (OPEC) nations since October 2022. Crude prices have been shed more than 40% as of June 2023 since the Russian invasion of Ukraine in February 2022. While WTI fell below US\$70 per barrel this week (US\$67.1 per barrel on June 12) before going up again, Brent prices have hovered around US\$75 per barrel. To reverse this trend, Saudi Arabia, the top producer in the OPEC cartel, has recently unanimously decided to cut production by another one million barrels per day from July and further limit the supply in 2024. These measures will likely keep prices volatile for a while, although the short-term outlook seems to be bearish.

INDIAN ECONOMY OVERVIEW

While the world is still in the woods, the probability of a recession this year has trimmed. Labor markets in several advanced countries remain tight, while the largest economy, the United States, is seeing a rebound in consumer confidence and spending. Risk spreads are declining on both sides of the Atlantic after the recent banking crisis in the United States.

India GDP Growth:

India, meanwhile, enjoys a Goldilocks moment as it sees its economic activity gaining momentum amid continuing global uncertainties. The last quarter's GDP data was pleasantly surprising but not completely unexpected. The GDP growth in the fourth quarter has pushed up the full-year GDP growth of FY2022-23 to 7.2%, 200 basis points (bps) higher than the earlier estimate. The recently released Annual Economic Review for the month of May 2023 highlighted that the post pandemic quarterly trajectories of consumption and investment have crossed pre pandemic levels.

India grew by 6.1% in the last quarter of FY 2022-23, which is approximately ~100 bps higher than what the market had anticipated. While the overall growth was broad-based, many sectors such as construction and agriculture experienced more-than-expected growth. In fact, strong growth in manufacturing proved to be a reassuring development as modest growth in the sector in previous quarters had been a concern for policymakers.

India Import & Export data:

On the expenditure side, exports performed well despite global headwinds, while imports recorded their slowest growth since December 2020, primarily because of easing crude oil prices bringing down India's import bills. Private consumption, the largest component of India's final demand, with a modest growth of 7.5% in FY2022-23, emerged as the weakest link in overall growth. The share of private consumption in GDP fell in the last quarter and was the lowest in the past seven quarters, dragged down by weak rural demand. However, things might be changing on that front as well.

The first-quarter data of FY2024 instils confidence in the improving health of the economy. Inflation in the first quarter was 4.5%, the lowest since the quarter of September 2019. Goods and Services Tax collections remain strong, suggesting that revenue buoyancy will aid in improving the budgeted fiscal deficit ratio to GDP. At the same time, India's external account has been improving, thanks to the falling import bills as oil prices ease.

(Source: India Economic Outlook, July 2023, Deloitte insights,)

Interestingly, the credit-deposit ratio has continued to improve strongly from the lows of the pandemic despite the rising interest rates (figure 1). A deeper dive reveals that most of the lending is happening in the industry and services sector. This points to improving investment, which means that the supply side is gearing up to meet the rising demand.

(Image Source: India Economic Outlook, July 2023, Deloitte insights,)

Inflation:

India has had better success in taming inflation with relatively lesser policy tightening. The Reserve Bank of India (RBI) intervened in May 2022 and has increased the policy rate six times in 11 months since, increasing the repo rate by 250 bps. The inflation in June 2023 was 4.8%, considerably lower than the last fiscal year

Impact of Interest rate hike by USA

A moderation in the rate hikes by the United States after a spree of rate hikes since February 2022 is a positive news for India. It has reduced the pressures on the RBI to maintain an interest differential needed for the currency carry trade (leveraging the interest-rate arbitrage) and to attract foreign investment (which has declined due to tighter global liquidity conditions).

Forecast of Indian Economic Growth

The first-quarter data points to further building on the positive momentum in the economic data. We continue to remain optimistic about the economy this year and expect India to grow between 6.0% and 6.3% during FY2023–24 in our baseline scenario, followed by 6.6% and 7.2% over the next two years as the global economy turns buoyant

(Source: India Economic Outlook, July 2023, Deloitte insights,)

(Image Source: India Economic Outlook, July 2023, Deloitte insights,)

Despite the recent easing of prices, core prices have not moderated yet. Besides, the risk of El Niño and a below-normal monsoon can bring back the pressure on food prices. We expect the fall in prices to be short-lived as demand picks up along with food prices and the uncertainties around prices remain high (hence, the broad range for forecasts over the next 1.5 years). However, the supply side will probably improve and may help the rebounding economy keep prices under check in the long run (with greater certainties). In any case, we expect inflation to remain in the upper range of the RBI's inflation target band over the entire forecast period

Government of India Measures/ Incentive for Economic Growth:

The government has been taking steps to make the country a USD 5 trillion economy at an early date," Minister of State for Finance Pankaj Chaudhary said in a written reply to the Upper House. Observing that the outbreak of the COVID pandemic in 2020 and the Russia-Ukraine conflict in 2022 has impacted the world output, increased inflation in several countries and raised uncertainty in the world economy, he said, "lower uncertainty in the global economic outlook will help India become a USD 5 trillion-dollar economy earlier"

Some of the important measures taken by the government in the past to boost economic growth include the making of the National infrastructure pipeline of projects, push to capital expenditure, implementation of the Production Linked Incentive (PLI) scheme, finalization of the National Monetization Pipeline of public sector assets and formulation of National Logistics policy, he said.

Further capital expenditure will be speeded up by PM Gatishakti for integrated planning of infrastructure and synchronized project implementation across all concerned central ministries, departments and state governments.

The other initiatives to boost the economy include enhanced outlay for PM Awas Yojana, the launch of the Aspirational Blocks Programme covering 500 blocks for saturation of essential government services; an increase in agriculture credit target to Rs 20 lakh crore with a focus on animal husbandry, dairy and fisheries; and setting up of Agriculture Accelerator Fund to encourage agri-startups by young entrepreneurs in rural areas, among others.

The 'effective capital expenditure' of the Centre is budgeted at Rs 13.7 lakh crore (4.5 per cent of GDP) for 2023-24, he said, adding "the newly established Infrastructure Finance Secretariat will oversee the increase in private investment in infrastructure".

In order to improve logistics performance, he said, one hundred critical transport infrastructure projects for last and first-mile connectivity for ports, coal, steel, fertilizer, and food grains sectors have been identified and will be prioritized for development.

The Shipping Industry, by nature, is a global industry which regulated by various agencies for safety and security of the ship, crew and the marine environment.

Directorate General of Shipping, India

The apex organization in shipping is the International Maritime Organization (IMO). The IMO is a specialized agency of the United Nations having the primary purpose to develop and maintain a comprehensive regulatory framework for shipping and its remit today includes maritime safety, environmental concerns, legal matters, technical co-operation, maritime security and the efficiency of shipping.

There are 174 Nations as member states to the IMO. Some of the important Rules & Regulations developed, ratified and enforced by the IMO are:

- UNCLOS: United Nations Convention on the Law of the Sea.
- SOLAS: Safety of Life at Sea
- MARPOL: Marine Pollution
- STCW Convention: Standards, Trainings, Certification & Watch keeping for Seafarers.
- SAR Convention: Maritime Search & Rescue
- Load Line Convention: For maximum loading of a ship

A comprehensive list can be found on (<https://www.imo.org/en/About/Conventions/Pages/Default.aspx>)

Indian Organization for Marine Operations

In India, the **Directorate General of Shipping (DGS)** is the apex organization for matters related to ships and shipping. The DGS ratifies conventions promulgated by the IMO into the **Merchant Shipping Act 1958**. They also issue circulars and orders on matters related to safety, human resources, cabotage and shipping development.

The **Mercantile Marine Department (MMD)** is the executive organization for DGS. They are located in various ports of India and are headed by the Principal Officer. They are tasked with survey of ships, registry of ships and conducting competency exams for seafarers.

Apart from MMDs a vessel owner having boats plying within the port limits can register their boat with the State Maritime Board i.e. **Maharashtra Maritime Board (MMB)**, **Gujarat Maritime Board (GMB)** etc. under the **Inland Vessels Act 2017**.

Vessel Registration and Jurisdiction

Flag State

Each ship / vessel / boat has to be registered with a certain registry, the place of registry of the ship is known as the Flag State of the vessel. E.g. If a ship is registered in Mumbai with the Registrar of Ships, Mumbai, the flag of the ship is Indian.

The Flag State is a member state to the IMO and being a member state, it would need to ratify and enforce most of the important conventions of the IMO into the local acts and laws. The ship will need to comply with all rules and regulations of the Flag nation it is flying.

Port State

A Port State is the nation into which the ship is berthing or in their territorial waters. A ship will also need to comply with the rules and regulations of the Port State in which she is going into.

Jurisdiction of Waters

Territorial Waters

The areas of water up to 12 Nautical Miles adjacent to the shores of a nation are known as territorial waters. All national rules (Flag State/Port State) are applicable as per the nationality of those waters.

Exclusive Economic Zones

As defined under the 1982 United Nations Convention on the Law of the Sea (UNCLOS), an area of the ocean extending up to 200 nautical miles (370 km) immediately offshore from a country's land coast in which that country retains exclusive rights to the exploration and exploitation of natural resources.

Classification Society for sea worthiness of Ships

A Classification Society (Class) is an independent organization that certifies the sea worthiness of a ship. The Class Certificate was originally used for the purpose of Insurance of the ship, however in modern times the Class certificates along with other certificates provided by Class has a wider statutory reach.

Every Flag State empowers Class to perform surveys on behalf of the Flag State surveyor. It is thus that the Classification Society has greater responsibility to act diligently on the trust bestowed on to them.

A Class will be involved with the construction of the ship to certify the construction of the ship are up to the standards and also assign a load line (i.e. maximum carriage capacity). During the operational life of the ship the Class will annually inspect the ship and endorse the sea worthiness.

International Association of Classification Societies (IACS) is a body with limited Classification Societies as members. They are the apex body for Class related matters and also advise the IMO on technical matters.

The **Indian Register of Shipping (IR Class)** is the prime Classification Society of India and a fulltime member of the IACS. It is a not-for-profit organization formed under the societies act and is recognized by DGS to carry out surveys and certifications of ships on its behalf.

Our Business Model

We drive our business from 3 Business verticals:

○ Offshore Logistics

Sadhav Shipping Ltd., supports the exploration & production of Oil & Gas in offshore fields. Our 4 DP Anchor Handling Tugs cum Supply Vessels (AHTSV's) carry out the following duties:

- Towing of Offshore assets
- Supply of Drilling materials including casing pipes, cement, baryte, drill water, brine etc.
- Participation in Search & Rescue Duties
- Transportation of men & material to offshore locations
- Other duties as guided by the charterer and within the scope of work.

All vessels operating under this sector are fitted with Dynamic Positioning Systems which enhance the safety of the ship, offshore asset and crew on board each. The vessels are also fitted with external Fire Fighting systems to tackle fires in offshore assets which may arise due to the hazardous environment.

The ships are given out on long term charter in an International Competitive Bidding process. The major client in this sector is Oil & Natural Gas Corporation (ONGC) which has the maximum offshore reserves in India.

○ Port Services

We operate High Speed Patrol craft for the Ports. We started this vertical in 2010 by providing 2 no's of High-Speed Boats to Paradip Port on long term contracts. The types of harbour crafts owned and operated by us are:

- a. **Pilot Boats** – These boats are used by the Port to transfer Harbour Pilots that guide the ship into and outside the harbour.
- b. **High Speed Patrol Boats** – These boats are used by the Ports in conjunction with CISF to undertake armed patrolling of the port waters.
- c. **Survey Boats** – They are used to undertake hydrographic and bathymetric surveys of the port channels and waters.
- d. **Work Boats** – Used by various agencies to undertake jobs of transporting men and materials inside harbour limits.
- e. **Lighterage Barges** – Used by cargo importers / exporters to transfer dry bulk cargo (coal / iron ore / chickpeas etc) to–fro the larger ships at anchorage to port. These are used to save time and cost for the cargo owner.

All our contracts for the above are on long term charter basis with the Ports or Private parties. We purchase / build the harbour craft only after we have secured a confirmed charter from the Port, this ensures that none of the boats are without any charter and the boats are made exactly as per the client's requirements. We currently operate in the following ports: Kandla, Vadinar, Mumbai, JNPT, Mangalore, Cochin, Paradip

In this vertical we also operate and maintain third party boats for clients viz. Inland Water Authority of India, Gujrat Police, JNPT, Paradip etc.

We also take up service works with the Ports such as providing Mooring Services (connecting the ships rope to land), Garbage Collection Services (collecting garbage from ships) and Flotsam collection services (collecting floating debris on water).

○ Oil Spill Response

We are one of the first company in India to start services of providing Tier-1 Oil Spill Response facility for the Ports.

We started the service in 2014 in Mumbai Port which was inaugurated by the then Minister of Shipping Shri Nitin Gadkari. The service was initially provided for Mumbai & JNPT Port.

We are now offering the service on long term retainer contracts to Kandla, Vadinar, Mumbai, JNPT, Mangalore & Paradip Port with more than 8100m of oil containment booms and a strength of 70 trained manpower.

4. Business Growth opportunities

As Indian economy is expanding its import and export has also seen growth in the last few years and is expected to grow in years to come. As per the data of Economic times [infra.com](https://economictimes.infra.com) major ports of India collectively handled a round-braking 795 million tons of cargo, registering a 10.10% growth over the previous year. Further data shows that Indian ports have achieved the highest-ever output per day of 17,239 tons, marking it a 6% increase compared to last year, data source "*ET Infra.com article titled: Indian ports going to compete with best ports in world: Sonowal*" dated April 29,2023. The Port Services sector is bound to grow in conjunction with the growth of the quantum of cargo handled by the ports.

With multi-fold investments in the offshore oil & gas sector and port sector, on a macro level, the business is bound to grow. Thus, looking at the market growth, we expect to expand our business by tie-up with other ports to offer existing services and also adding new service offerings. The requirement of vessels in ONGC Ltd. is expected to increase by approximately 35% in the coming year 2024 / 2025.

In the port sector, with the aging profile of existing harbour crafts and the advent of green technologies, the demand for electric / hybrid port crafts is bound to increase by 20% y-o-y. The Oil spill Response market in India is still very nascent and is on the cusp of high growth. The right regulatory framework is being put into place by the Governmental agencies for its growth to occur.

A. Budgeting:

The purchaser / organization defines the scope of work for the vendors, terms and conditions and various other details before asking the probable bidders for a budgetary quote (BQ). The process is also known as Request for Proposal (RFP).

After receiving the BQ from various vendors, the purchaser then takes approval from the competent authority to create a budget for the expenditure to acquire the materials / services.

Based on the budget, the other financial security of the tender is decided.

B. Issue of Tender Notice, Global / Domestic Tenders

The purchaser issues the Tender Notice and based on the sensitiveness of the scope of work it may be a closed tender. A closed tender is one in which the tender notice is sent to a pre-selected group of vendors who are technically eligible to undertake the works.

C. Pre-Bid Meeting

A pre-bid meeting is held with the Bidders to discuss various technical aspects regarding their queries. Tenderers may submit relevant queries to the Tender Inviting Authority within the prescribed period as mentioned in the tender. After the pre-bid meeting the minutes of the meeting and relevant corrigendum or amendments are published by the authorities.

Bids received without original EMD are not evaluated further and in case of any other deficiencies, the technical bid is rejected and the financial bid is not opened. On successful completion of the technical opening process, the tender is placed at the stage of Technical Evaluation.

G. Technical Evaluation of Bids

Bidders are evaluated on the basis of documentary evidence. Initially only those bidders are considered eligible by the Tender Inviting Authority, who have submitted the required EMD/MSME certificate for exemption of EMD, tender fee/MSME certificate for exemption of tender fee wherever applicable. During the bid validity period, technical bids are thoroughly checked by the Technical Evaluation Committee. This evaluation includes assessing factors like quality, experience, and compliance with the requirements. Depending on the number of bids received, the time required to review bids may vary. If necessary, The Tender Inviting Authority reserves the right to extend the bid validity period. If they find any short documents or require any clarification against the submitted bids, they send a request for submission of short documents or clarifications within the given period. Eligible and responsive bidders are notified for the date and time of price bid opening.

H. Price Bid Opening

Financial bids of the technically qualified bidders are opened by the Tender Inviting Authority in the presence of bidders or their authorized representatives who wish to be present on the notified date and time. The financial bids of the bidders are opened one by one. The system automatically generates a comparative statement or bidders have to note down the price bid. After evaluation of bids, all bidders get information on the e-procure site, if bids are submitted online. Thereafter, a system generated e-mail confirmation is sent to all successful bidders. Bidders can check the status of their financial bid and the ranking of bidders from the e-portal.

I. Price Negotiation

Negotiated rates, terms and conditions should be acceptable to both parties. Once both parties have agreed to all the terms and conditions, the contract needs to be executed to make it legally binding.

If it is specified in NIT that this is a Tender cum e-Reverse Auction Tender Process then, the e-Reverse Auction process is compulsorily conducted after the opening of financial bids. After opening the financial bids, a reverse auction platform is created. The reverse auction starts within a specified period of the bid. An initial period of the reverse auction is as stipulated. There are auto extensions of time by specified minutes, in case of any reduction recorded in the last auto-extension period. The Maximum number of auto extensions is as stipulated in the tender.

International Commercial Terms ("Incoterms")

Incoterms are standard trade definitions most commonly used in international sales contracts. Devised and published by the International Chamber of Commerce ("ICC"), they are at the heart of world trade. ICC introduced the first version of Incoterms in 1936. Most contracts made after January 01, 2000 will refer to the latest edition of Incoterms, which came into force on that date. The correct reference is "Incoterms 2000". Unless the parties decide otherwise, earlier versions of Incoterms - like Incoterms 1990 - are still binding if incorporated in contracts that are unfulfilled and are dated before January 01, 2000. The latest version of Incoterms is designed to bring Incoterms in line with the latest developments in commercial practice. Correct use of Incoterms goes a long way to providing the legal certainty upon which mutual confidence between business partners must be based. Among the best-known Incoterms are EXW (Ex works), FOB (Free on Board), CIF (Cost, Insurance and Freight), DDU (Delivered Duty Unpaid), and CPT (Carriage Paid To).

The Indian Carriage of Goods by Sea Act, 1925 ("COGSA")

The Act provides the rules set out under the Schedule to the Act('Rules') in relation to and in connection with the carriage of goods by sea in ships carrying goods from any port in India to any port whether in or outside India. It also provides that every bill of lading, issued in India which contains or is evidence of any contract to which the Rules apply, shall contain an express statement that it is to have effect subject to the provisions of the said Rules. The Rules also set out the responsibilities, liabilities and the rights and immunities of the carrier.

Further, certain substances harmful to the marine environment have been identified as 'marine pollutants' in accordance with International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978. Penalties for non-compliance of the orders given by the quasi-judicial bodies have also been provided.

Competition Act, 2002

The Competition Act, 2002 ("Competition Act") aims to prevent anti-competitive practices that cause or are likely to cause an appreciable adverse effect on competition in the relevant market in India. The Competition Act regulates anti-competitive agreements, abuse of dominant position and combinations. The Competition Commission of India ("Competition Commission") which became operational from May 20, 2009 has been established under the Competition Act to deal with inquiries relating to anti-competitive agreements and abuse of dominant position and regulate combinations.

The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti-competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

The Companies Act deals with laws relating to companies and certain other associations. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Companies Act prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. It deals with issue, allotment and transfer of securities and various aspects relating to company management. The right to use the mark can be exercised either by the registered proprietor or a registered user. The present term of registration of a trademark is 10 (ten) years, which may be renewed for similar periods on payment of a prescribed renewal fee.

Foreign Exchange Management Act, 1999 and Consolidated Foreign Direct Investment Policy Circular of 2017 (as amended from time to time)

Foreign investment in companies in the manufacturing sector is governed by the provisions of the Foreign Exchange Management Act, 1999 ("FEMA") read with the applicable regulations. The Department of Industrial Policy and Promotion ("DIPP"), Ministry of Commerce and Industry has issued the Consolidated FDI Policy which consolidates the policy framework on Foreign Direct Investment ("FDI Policy"), with effect from August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till August 27, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017. In terms of the FDI Policy, foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where Government approval is obtained, no approval of the RBI

is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue of security to a person resident outside India. The Company is engaged in the activity of wholesale trading and multi-brand retail trading. The FDI Policy issued by the DIPP permits foreign investment upto 100% in the Cash and Carry Wholesale Trading/ Wholesale Trading ("WT") sector under the automatic route. Further, the FDI Policy permits foreign investment upto 51% in the multi-brand retail sector under the government route subject to certain conditions which are mentioned below.

- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting date, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Based on the nature of products and services offered by the Company, operating cycle determined is 12 months for the purpose of current and non-current classification of assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents,

2.4 Critical Accounting Estimate & Judgements

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind. AS requires management to make judgments, estimates and assumptions, that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

2.5 Property, Plant and Equipment's:

Property, Plant and Equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment losses, if any. Such cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

In case of land the Company has availed fair value as deemed cost on the date of transition to Ind AS. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Property, Plant and Equipment which are significant to the total cost of that item of Property, Plant and Equipment and having different useful life are accounted separately.

Other Indirect Expenses incurred relating to project, net of income earned during the project development stage prior to its intended use, are considered as pre - operative expenses and disclosed under Capital Work - in - Progress.

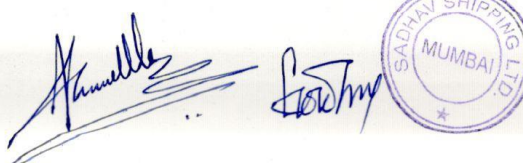

2.6 Depreciation:

Depreciation on Property, Plant and Equipment is provided using straight line method on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013. The residual values, useful life and depreciation method are reviewed at each financial year-end to ensure that the amount, method and period of depreciation are consistent with previous estimates and the expected pattern of consumption of the future economic benefits embodied in the items of property, plant and equipment.

Depreciation on assets under construction commences only when the assets are ready for their intended use.

The Estimated useful lives of main categories of property, plant & equipment and intangible assets are;

Vessels, Barges & Speed Boats	10 Yrs to 28 Yrs
Building	45 Yrs
Computers & Softwares	3 Yrs
Printers	10 Yrs
Furniture & Fixtures	5 Yrs to 10 Yrs
Office Equipment	5 Yrs to 10 Yrs
Motor Vehicles	8 to 10 Years

2.7 Intangible Assets

Intangible Assets are stated at cost of acquisition net of recoverable taxes, trade discount and rebates less accumulated amortization / depletion and impairment losses, if any. Such cost includes purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the Intangible Assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Other Indirect Expenses incurred relating to project, net of income earned during the project development stage prior to its intended use, are considered as pre - operative expenses and disclosed under Intangible Assets Under Development.

Gains or losses arising from de-recognition of an Intangible Asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is de-recognised.

2.8 Impairment of Assets

Property, plant and equipment and intangible assets that are subject to depreciation / amortization are tested for impairment periodically including when events occur or changes in circumstances indicate that the recoverable amount of the cash generating unit is less than its carrying value. The recoverable amount of cash generating units is higher of value-in-use and fair value less cost to sell. The calculation involves use of significant estimates and assumptions which includes turnover and earnings multiples, growth rates and net margins used to calculate projected future cash flows, risk-adjusted discount rate, future economic and market conditions.

The Company reviews its carrying value of investments carried at cost or amortized cost annually or more frequently when there is indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

An impairment loss is recognized in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. Reversal of impairment loss is recognized immediately as income in the statement of profit and loss.

2.09 Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

A lease is classified at the inception date as a finance lease or an operating lease. A

lease that transfers substantially all the risks and rewards incidental to ownership to the lessee is classified as a finance lease.

Finance Lease as a lessee

Finance leases are capitalised at the commencement of the lease at the inception date at fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the statement of profit and loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on the borrowing costs. Contingent rentals are recognised as expenses in the periods in which they are incurred. A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating Lease as a lessee

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term except where another systematic basis is more representative of the time pattern in which economic benefits from leased assets are consumed. The aggregate benefit of incentives (excluding inflationary increases) provided by the lessor is recognized as a reduction of rental expense over the lease term on a straight-line basis. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

2.10 Financial Instruments

a. Financial assets

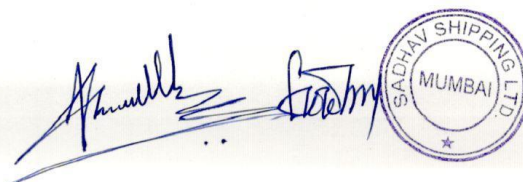

Initial recognition and measurement

Financial assets are recognised when, and only when, the Company becomes a party to the contractual provisions of the financial instrument. The Company determines the classification of its financial assets at initial recognition.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss directly attributable transaction costs. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the Statement of Profit and Loss.

Classification

- **Cash and Cash Equivalents** – Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

- **Debt Instruments** - The Company classifies its debt instruments as subsequently measured at amortized cost, fair value through Other Comprehensive Income or fair value through profit or loss based on its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

(i) Financial assets at amortized cost

Financial assets are subsequently measured at amortized cost if these financial assets are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest. Interest income from these financial assets is included as a part of the Company's income in the Statement of Profit and Loss using the effective interest rate method.

(ii) Financial assets at fair value through Other Comprehensive Income (FVOCI)

Financial assets are subsequently measured at fair value through Other Comprehensive Income if these financial assets are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest. Movements in the carrying value are taken through Other Comprehensive Income, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains or losses which are recognised in the Statement of Profit and Loss. When the financial asset is de-recognised, the cumulative gain or loss previously recognised in Other Comprehensive Income is reclassified from Other Comprehensive Income to the Statement of Profit and Loss. Interest income on such financial assets is included as a part of the Company's income in the Statement of Profit and Loss using the effective interest rate method.

(iii) Financial assets at fair value through profit or loss (FVTPL)

Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on such debt instrument that is subsequently measured at FVTPL and is not part of a hedging relationship as well as interest income is recognised in the Statement of Profit and Loss.

- **Equity Instruments** - The Company subsequently measures all equity investments (other than the investment in subsidiaries, joint ventures and associates which are measured at cost) at fair value. Where the Company has elected to present fair value gains and losses on equity investments in Other Comprehensive Income ("FVOCI"), there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in the Statement of Profit and Loss as other income when the Company's right to receive payment is established.

The Company has made an irrevocable election to present in Other Comprehensive Income subsequent changes in the fair value of equity investments that are not held for trading.

When the equity investment is de-recognised, the cumulative gain or loss previously recognised in Other Comprehensive Income is reclassified from Other Comprehensive Income to the Retained Earnings directly.

De-recognition

A financial asset is de-recognised only when the Company has transferred the rights to receive cash flows from the financial asset. Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is de-recognised. Where the Company has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not de-recognised. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

b. Financial Liabilities

Initial recognition and measurement

Financial liabilities are recognised when, and only when, the Company becomes a party to the contractual provisions of the financial instrument. The Company determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognised initially at fair value, plus, in the case of financial liabilities not at fair value through profit or loss directly attributable transaction costs.

Subsequent measurement

After initial recognition, financial liabilities that are not carried at fair value through profit or loss are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the Statement of Profit and Loss when the liabilities are de-recognised, and through the amortisation process.

De-recognition

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

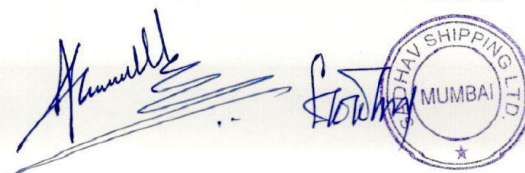

Derivatives

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged and the type of hedge relationship designated. The fair value changes of derivatives which are not designated as a hedging instrument are accounted through Statement of Profit and Loss.

During the years reported, no hedge relationship was designated.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of

an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in the Statement of Profit and Loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

c. Impairment of financial assets

The Company assesses, at each reporting date, whether a financial asset or a group of financial assets is impaired. Ind AS-109 on Financial Instruments, requires expected credit losses to be measured through a loss allowance. For trade receivables only, the Company recognises expected lifetime losses using the simplified approach permitted by Ind AS-109, from initial recognition of the receivables. For other financial assets (not being equity instruments or debt instruments measured subsequently at FVTPL) the expected credit losses are measured at the 12 month expected credit losses or an amount equal to the lifetime expected credit losses if there has been a significant increase in credit risk since initial recognition.

2.11 Segment Reporting

The company identifies operating segments based on the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions. The accounting policies adopted for segment reporting are in line with the accounting policies of the company. Segment revenue, segment expenses have been identified to segments on the basis of their relationship to the operating activities of the segment.

2.12 Inventories:

All materials and consumables procured for the purpose of vessel and barge repairs are recognized as expenses immediately upon purchase.

2.13 Foreign currency transactions and translation:

The functional currency of the Company is Indian Rupee (₹).

Initial Recognition

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Subsequent Recognition

As at the reporting date, non-monetary items which are carried at historical cost and denominated in a foreign currency are reported using the exchange rate at the date of

the transaction. All non-monetary items which are carried at fair value denominated in a foreign currency are retranslated at the rates prevailing at the date when the fair value was determined.

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are translated at the exchange rate prevailing on the Balance Sheet date and exchange gains and losses arising on settlement and restatement are recognised in the Statement of Profit and Loss.

2.14 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is recognized upon transfer of property of goods to buyer, provided persuasive evidence of an arrangement exists, tariff / rates are fixed or are determinable and collectability is reasonably certain. Revenue from sales of goods / service or rendering of services is net of Indirect taxes, returns and discounts.

Income from services

Income from services is accounted for an accrual basis except for compensation which is accounted for on receipt.

Dividend Income

Dividend income is recognized when the Company's right to receive the payment is established.

Other Income:

Interest on Bank's Fixed Deposits and other income are recognized on accrual basis.

2.15 Employees Benefits

Defined contribution plans

Contributions under defined contribution plans are recognised as expense for the period in which the employee has rendered service. Payments made to state managed retirement benefit schemes are dealt with as payments to defined contribution schemes where the Company's obligations under the schemes are equivalent to those arising in a defined contribution retirement benefit scheme.

Defined benefit plans

For defined benefit retirement schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuation being carried out at each year-end balance sheet date. Remeasurement gains and losses of the net defined benefit liability/(asset) are recognised immediately in other comprehensive income.

The service cost and net interest on the net defined benefit liability/(asset) are recognised as an expense within employee costs.

Past service cost is recognised as an expense when the plan amendment or curtailment occurs or when any related restructuring costs or termination benefits are recognised,

whichever is earlier.

The retirement benefit obligations recognised in the balance sheet represents the present value of the defined benefit obligations as reduced by the fair value of plan assets.

Compensated absences

Liabilities recognised in respect of other long-term employee benefits such as annual leave and sick leave are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date using the projected unit credit method with actuarial valuation being carried out at each year-end balance sheet date. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to the statement of profit and loss in the period in which they arise.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised based on actuarial valuation.

2.16 Retirement Benefits

The Company's retirement benefit obligations are subject to number of assumptions including discount rates, inflation and salary growth. Significant assumptions are required when setting these criteria and a change in these assumptions would have a significant impact on the amount recorded in the Company's balance sheet and the statement of profit and loss. The Company sets these assumptions based on previous experience and third-party actuarial advice.

2.17 Taxes on Income

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in Other Comprehensive Income or directly in equity, in which case, the current and deferred tax are also recognised in Other Comprehensive Income or directly in equity, respectively.

(i) Current tax:

Current tax expenses are accounted in the same period to which the revenue and expenses relate. Provision for current income tax is made for the tax liability payable on taxable income after considering tax allowances, deductions and exemptions determined in accordance with the applicable tax rates and the prevailing tax laws.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis.

(ii) Deferred Tax:

Deferred income tax is recognised using the balance sheet approach. Deferred tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred tax arises from the initial recognition of goodwill, an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

Deferred tax liabilities are generally recognised for all taxable temporary differences except in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantially enacted by the end of the reporting period.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

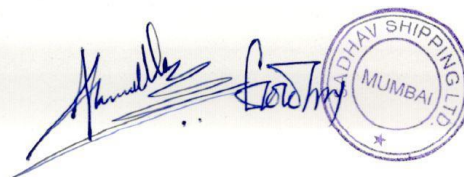

Minimum Alternative Tax ("MAT") credit forming part of deferred tax assets is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a reasonable certainty to the effect that the Company will pay normal income tax during the specified period.

2.18 Borrowing Cost:

Borrowing cost includes interest cost and bank commissions incurred in connection with the arrangement of borrowings. Borrowing cost directly attributable to acquisition or construction of Fixed Assets which necessarily take a substantial period of time to get ready for their intended use, incurred till the time of commencement of assets are ready to use or their intended use are capitalized. All other borrowing costs are expensed in the period they occur.

2.19 Exceptional Items

The Company discloses certain financial information both including and excluding exceptional items. The presentation of information excluding exceptional items allows a better understanding of the underlying operating performance of the Company and

provides consistency with the Company's internal management reporting. Exceptional items are identified by virtue of either their size or nature so as to facilitate comparison with prior periods and to assess underlying trends in the financial performance of the Company. Exceptional items can include, but are not restricted to, gains and losses on the disposal of assets / investments, impairment charges, exchange gain / (loss) on long term borrowings / assets and changes in fair value of derivative contracts.

2.20 Earnings Per Share

Basic earnings per share is computed by dividing the profit or loss after tax by the weighted average number of equity shares outstanding during the year adjusting the bonus element for all the reported period arising on account of issue of equity shares on rights and including potential equity shares on compulsory convertible debentures. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share.

2.21 Statement of Cash Flows

Cash flows are reported using the indirect method, whereby profit / (loss) before tax is adjusted for the effects of transactions of non cash nature and any deferrals or accruals of past or future cash receipts or payments. Cash flow for the year are classified by operating, investing and financing activities.

2.22 Provisions, Contingent and Contingent Assets

Provisions are recognized when the Company has a binding present obligation. This may be either legal because it derives from a contract, legislation or other operation of law, or constructive because the Company created valid expectations on the part of third parties by accepting certain responsibilities. To record such an obligation it must be probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made for the amount of the obligation. The amount recognized as a provision and the indicated time range of the outflow of economic benefits are the best estimate (most probable outcome) of the expenditure required to settle the present obligation at the Balance Sheet date, taking into account the risks and uncertainties surrounding the obligation. Non-current provisions are discounted if the impact is material.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. The Company does not recognize a contingent liability but discloses its existence in the financial statements. Payments in respect of such liabilities, if any are shown as advances.

2.23 Recent Accounting Pronouncement

Ministry of Corporate Affairs (“MCA”) has notified the following new amendments to Ind AS which the Company has not applied as they are effective for annual periods beginning on or after April 1, 2023.

Amendment to Ind AS 1 “Presentation of Financial Instruments”

The amendments require companies to disclose their material accounting policies rather than their significant accounting policies. Accounting policy information is material if, together with other information can reasonably be expected to influence decisions of primary users of general-purpose financial statements. The Company does not expect this amendment to have any significant impact in its financial statements.

Amendment to Ind AS 12 “Income Taxes”

The amendments clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations. The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of Ind AS 12 (recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The Company is evaluating the impact, if any, in its financial statements.

Amendment to Ind AS 8 “Accounting Policies, Changes in Accounting Estimates and Errors”

The amendments will help entities to distinguish between accounting policies and accounting estimates. The definition of a change in accounting estimates has been replaced with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. Entities use measurement techniques and inputs to develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The Company does not expect this amendment to have any significant impact in its financial statements.

Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and was continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase will commence upon completion of Phase I i.e with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), issued the Consolidated FDI Policy Circular of 2017 ("FDI Policy") with effect from August 28 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee Company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
