Revenue & Expenses In Rs. Cr.

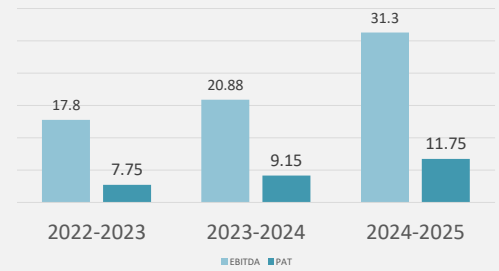

Company Performance

- Rs. 97.44 cr Revenues FY 2024-25
- Rs. 17.41 cr PAT FY 2024-25

Revenue in Rs. Cr.

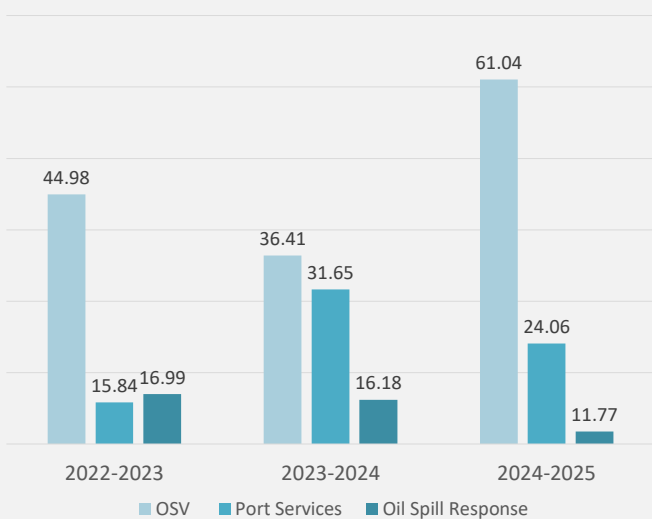

EBIDTA & PAT (Rs. Cr)

Segment Wise Performance

- Strong Growth in OSV Sector reflecting conducive market conditions
- Negative growth in Ports and OSR owing to contract closures

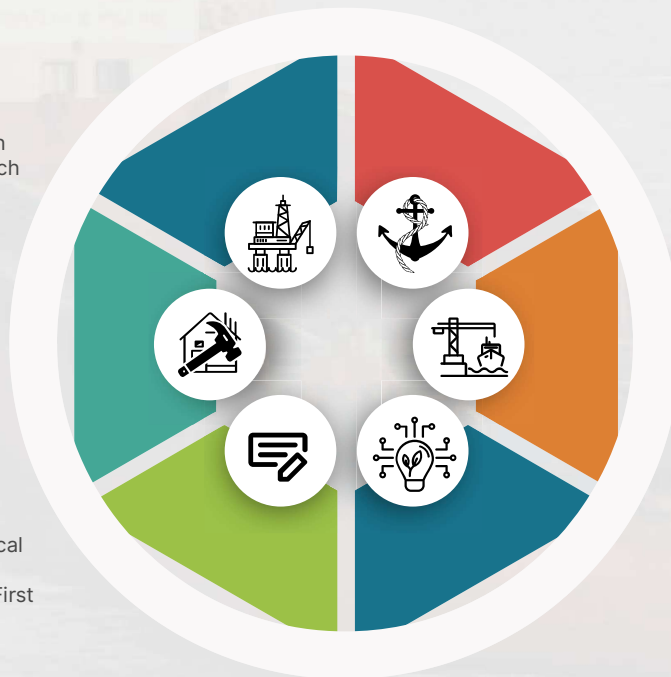

Segment Wise Revenues (Rs. Cr.)

Key Market Drivers

01 Oil & Gas Prices
A major driver for Exploration & Production companies which use our services.

02 Newbuilds
A scarcity of new building programs due to high asset prices and unavailability of Yards have a positive impact on business.

03 Government Policies
Government protection to local ship owners have through cabotage laws and Right of First Refusal

04 Age Barrier
Maximum age caps of charterers are shrinking the size of the present fleet.

05 Port Infra Push
Govt. & Private push to increase Port Infra is having a positive effect on requirement of allied services

06 Green Tech
New Green Technology is becoming a major driver in fleet renewal options.

Future At Sadhav

Increasing demand of fuel- efficient ships and leaps in technology require us to place orders for new ships with increased operational reliability.

New Ships

With a recent foothold in West Africa, Sadhav is poised for growth in the Oil & Gas Sector there.

International

Using strategic partnership with strong players in electric mobility solutions, the Company is poised to dominate the electric boat market with probable customers

Electric Boats

A very niche sector and strategic partnership with International Brands give Sadhav the technological edge to participate in higher value contracts.

Oil Spill Response

Transformative Collaborations

United Sadhav
Integrated Maritime Pvt. Ltd.

Representative Image

United Petro Group (UPG) and Sadhav Shipping Ltd. have embarked on a transformative joint venture to establish

1. State-of-the-art offshore supply base
2. Shipbuilding facility.
3. Ship Owning & Leasing

This strategic collaboration, formalized through an MoU with the Government of Odisha, aims to position the region as a hub for sustainable maritime infrastructure. The project encompasses large-scale ship construction, repair capabilities for 20–25 vessels annually, and integrated offshore logistics support—including warehousing and material storage

Transformative Collaborations

DESMI and Sadhav: A Partnership Anchored in Trust and Innovation

Sadhav Shipping and DESMI RO-CLEAN have formalized a five-year partnership to advance oil spill response capabilities in India. Building on years of trusted equipment deployment, Sadhav now serves as DESMI's exclusive OEM representative—offering certified training, maintenance, and repair services. This collaboration blends DESMI's global expertise with Sadhav's operational depth, reinforcing India's marine environmental readiness through scalable, sustainable solutions.

Market Opportunities

- OFFSHORE SUPPLY

1. Crew Transfer Vessels (CTV), the worldwide market is picking up for these type of vessels, especially as they are reducing dependency on helicopter services.
2. Anchor Handling Tugs: New energy efficient ships are being awarded with higher charter values.
3. Long Ocean Tows: A new market area to be captured as it can utilise older tonnage for international tow's.

Market Opportunities

- **PORT SECTOR:**

1. **Increasing Port Traffic:** With an increase in Port Traffic, the related infrastructure requirements have also increased and demand for new quality assets have increased.
2. **Electric Boats** Sadhav has tied up with one of the country's top e-mobility company for developing an electric boat.
3. **Outsourcing:** Trend of some of non-core activities of the Port are being outsourced.

Market Opportunities

- OIL SPILL RESPONSE:

1. Sadhav has tied up with world leading technology and equipment manufacturer DESMI RoClean A/s, Denmark.
2. It is actively marketing the products and services in Ports and Coast Guard.
3. Developing regional Oil Spill Response Centres to tackle spills in Minor and Major Ports.
